External domain names

Domain names · https://kyzoe.be/en/docs/external-domain-names/

If you bought a domain name from another provider, you can of course transfer it to us – we are usually cheaper. If you would rather keep the domain name with the other provider, you can easily link it to our hosting servers by entering the following name servers in your provider's DNS management panel. Use the following DNS servers:

- ns1.vcloudhosting.eu
- ns2.vcloudhosting.eu

If you bought the domain name from Kyzoe.be, you initially don't need to do anything; our platform takes care of everything. Of course, you can also manage your DNS, add records or change them. You can read all about this in this article.
